Robert--

Followup to our conversation this morning concerning your Summary Report:

1. Delete the 4 (four) proposed off-site boreholes. The subsurface investigation shall be limited to US Government property at this time.
2. Propose the installation of three (3) permanent groundwater monitoring wells and reduce the number of temporary groundwater monitoring wells to off set the cost difference.
3. Provide a groundwater elevation map showing the apparent direction of groundwater flow from the information collected in the initial round of sampling.
4. Indicate in your Summary Report that you propose to be on site for the next round of drilling on Monday, June 23. We have to confirm this with Census.
5. I understand that you plan to issue the revised Summary Report on Monday, June 16.

Give me a call if you have any questions. Thanks

Dear Phil

Attached is the summary report for the work to date at Jeffersonville.

I will be out of the office Thursday and Friday and will be back on Monday

If you have any questions or comments, call me on my cell or email me.

Thanks

Rob
